

# Feedback about this week

Amazing team that made this?

IQ, Daniel, Stella and Salami

# What we liked?

- People
- The city
- The fact that we learned other languages
- That we made a song about Google
- Spending so much time with the group, playing games and visiting the city
- Bonding with other people
- Every thing was well prepared for us

# What we didn't like?

- The food was bad (for IQ)
- The rain
- So little free time
- It was boring sometimes

# What we learned

- New languages
- New cultures
- New food
- New apps
- Portuguese education system
- How wood factories work
- What a train center is

# Hopes

- Make new friends
- Knowing people from other cultures
- To meet hot and tall ( not Kristoffer though) guys( Salami, Stella and IQ)
- Make new friends to keep in touch with even after the project has ended
- Meet a guy called Carlos for the first time.

All our hopes became real after meeting and becoming such good friends.  
YAY

# Fears

- Not getting along with the other students.
- Being reserved
- Not being able to talk in English
- Being misunderstood because of the cultural differences.

Now, at the end of the week, it has been proven that we all get along and we are now besties, for life, proving that these fears were proven wrong.
