

Dear students from different parts of Europe,

It is a great honor and a great pleasure for me to welcome all of you to Denmark. To Denmark and to our training place here called Campus.

I hope you will have a wonderful week in Denmark, where you will learn a little about our beautiful country and how it is to live here and to be young in Denmark.

Each of you is a very important person - You bring something valuable with you - both because of them you are as human beings and as them you are because you represent your country with a different culture.

It is my hope that you will learn a little of Denmark - both our nature, which is quite unique and our culture that has a broad reach.

We are proud to live in a country where democracy has a vital place, and where the individual is met with great respect.

We are also part of Varde Municipality. Varde Municipality has a slogan: We are in the nature.

We also have three value words:

Value proper

We in Varde meet each other and the public with confidence and open ears. We contribute with our professionalism, humanity and diversity to find solutions for the benefit of the individual and the whole. We will respond quickly and easily understood.

Value Creation

We in Varde create value for people and communities by solving the puzzles together. The municipality is a community helper that opens up people's dreams of the good life and for the local involvement.

Value Strong

We in Varde is a strong team, that actively contributes to the development of this area. We tickle conventional thinking. And then we get things done when work needs to be done.

I hope you will have a great week in Varde among our students.

- The opening words delivered by the headmaster
